

1. Read elements to an array also ask user for row size and column size.
 2. Search for a number in 2D array.
 3. Find second largest number from 2D-array.
 4. Write a Program to print the sum of the numbers in a 2D Array?
 5. Find average of all odd numbers from 2D array.
 6. Find the logic to identify the biggest number in diagonal of a 2D array and replace with that value in a Diagonal places?
 7. Find the Sum of the both the Diagonals individually in a 2D array?
 8. Input: {{1,2,3},{3,5,4},{4,5,6}} output:{{4,5,6},{3,5,4},{1,2,3}}
 9. Write a program to check given matrix is identity matrix or not.
 10. Input: {{7,0,0},{0,7,0},{0,0,7}} output: 7-Identity matrix
 11. Find the Given 2D array is Equal Row Matrix or Equal Column Matrix?
Ex1: Input: {{2,2,2},{5,5,5},{6,6,6}} Output: Equal Row Matrix
Ex2: input: {{1,2,3},{1,2,3},{1,2,3}} output: Equal Column Matrix
 12. Write a Program to Print the sorted 2D array?
 13. Write a Program to print the Multiplication matrix of a given two arrays?
 14. Write a Program to print the Trace of a Matrix of a Given 2D array
 15. Input: {{1,2,3},{4,5,6},{5,6,7}} output: {{1,2,3,6},{4,5,6,15},{5,6,7,18}} (Last value sum of row values)
 16. Use any method to solve $x+2y+z=1$, $x-2y+3z=0$; $x+2y=2$ using arrays.
