

Basic->Conditions Control Statements and Series:-

1. Write a program to convert kg to g. (Input 5.6kg print in grams)
2. Write a program to convert temperature from degree C to F. (Input 80C) $(80^{\circ}\text{C} \times 9/5) + 32 = 176^{\circ}\text{F}$
3. Declare and initialize 3 three variable and print the biggest number.
4. Write a java program that performs the following tasks.
 - a. Store a number in a variable
 - b. If value is not in range (100-1000) prints wrong number else follows the steps
 - c. Check even or odd
 - d. If even divide the number by 3 and print the remainder
 - e. If odd divide the number by 2 and print the remainder.
5. Declare & initialize a number. Check whether the number is in range 0-100 or not. If not in range print invalid input. Else – if the number is in range 91-100 then print Super Smart, 81-90 print Smart, 71-80 print smart enough, 61-70 print just smart, 36-60 print no smart, 0-35 print dump.
6. Write a program to perform simple math based on the user inputs by using Switch condition.(+ , - , * , /)
7. Write a program to print **CVCORP** for 33 times.
8. Write a program to print all numbers which are divisible by 11 from 250 to 550.
9. Write a program to sum all the numbers from 56 to 153.
10. Write a program to print all even numbers in range 700 to 900.
